Weekly Progress report (Minor Project: 2018-19)

Name of Guide: Shirish Nagar   **Week Date:** 28th July,2018 - 6th August,2018

Title of Project:- Smart Farming

Name of Team Members:- Prakshi Agrawal , Rani Kumari

Date of Submission :-13th August,2018   **Ongoing Project Stage**: Stage 1-Stage 7

Work done till Date:-

- We have made the project proposal (which includes project groups, the we have selected category of projects , then we have done problem identification and definition , after that we have done literature survey of problem)

- Finally we had made Synopsis of project.

Work to be shown in next meeting:- Software Requirement Specifications (SRS)

Point of discussion:-Discussed about

- more Features and Functionality which can be included in our project

- various applications and scope of our project.

Proposed Solution /outcome of problem:- We are able to identify:-

- what features we can include in our project.

- also we are asked to use different softwares like Netbeans etc.

Technical learning:-

- We have gathered all the information regarding sensors and other hardwares like motor , Raspberry Pi etc . to be used for IOT in our projects .

- Also we have learned from where and how we have to gather data form different sites for Machine Learning.
